What it does....

01

Enables one to be able to buy spare parts

2

One can order spare parts online

Demo video

Technologies applied

1

Css -for styling

2

Html-for page structure

3

React-for building the app

Future plans

To ensure a buyer saves time instead of going to the market they can be able to order online and it will be delivered. We also plan that we will fix the spare parts in the vehicles.

Summary of the app

It's an app where buyers order vehicles spare parts in order to save time.

Thank you for listening any question???
